

SEARCHING THE READINGS

To search the Readings: Type your word or words in the search box titled “Search this website”. For a very specific search, place your text within quotes.

To search within a reading while online: Click “Command F” on a Mac or “Control F” on a PC. A window will appear in the upper left. Type your word/s and click “return/enter”.

To bring up a list of all the readings in a body of study: In the search window type a space, followed by the 2-letter “Reading Code” followed by a space.

For example:

“Space > GE > space” - will bring up all the readings in the “General” category: **Emotion and Thought**

“Space > MA > space” - will bring up all the readings in the “Project” category: **Attunement**

“Space > SJ > space” - will bring up all the readings in the “Series” category: **Christ, Jesus, Bible, Religiosity**

A reminder: The Studies done (General Topics, Series, Projects, Work Readings) were specific to those topics but, very often, much more information can be found in the personal readings.
